NAUFAL MUHAMAD ADZKIA

Bandung, West Java | 0812-2011-8750 | naufalmadzkia@gmail.com | linkedin.com/in/naufal-muhamad-adzkia

PROFESSIONAL SUMMARY

Geological Engineer with 5+ years of experience in geological investigation, exploration data management, and data analytics for Indonesia's upstream oil and gas industry. Experienced in supporting SKK Migas and Pertamina Hulu Energi through geological, geophysical, and production data analysis, database management, technical reporting, and digital solutions. Strong analytical, QA/QC, and problem-solving skills with a passion for improving exploration decision-making through data-driven approaches.

EXPERIENCE

WAVIV TECHNOLOGIES *(30+ employee professional service company)* *Jakarta & Bandung*
Geoscience Data Scientist & Analyst *Feb 2023 – Present*

Professional Digital Solutions Company for the Energy Industry | Official Partner of Landmark Halliburton Indonesia

- Developed analytical applications and digital solutions supporting SKK Migas and Pertamina Hulu Energi across geological, geophysical, production, and exploration datasets.
- Built dashboards and integrated databases to improve technical reporting, monitoring, and decision support.
- Performed data validation, QA/QC, transformation, and statistical analysis on large subsurface and operational datasets.
- Developed machine learning models for oil production forecasting and production performance analysis.
- Developed AI-assisted systems for technical document evaluation and engineering knowledge retrieval, reducing manual review effort by 40–50%.
- Collaborated with geoscientists, engineers, developers, and business stakeholders to deliver enterprise digital solutions.

LAPI ITB *(20+ employee professional service company)* *Bandung & Field Sites*
Researcher Analyst and Site Manager *May 2021 – Jan 2023*

- Conducted geological investigations, field mapping, sampling, and environmental assessments for government and energy-sector projects.
- Managed geological and spatial datasets, implementing database structures and QA/QC procedures for technical reporting.
- Utilized Petrel, ArcGIS, and QGIS for geological interpretation and visualization.
- Coordinated multidisciplinary field teams while ensuring project quality, safety, and timely delivery.

EDUCATION

BANDUNG INSTITUTE OF TECHNOLOGY *Bandung*
Bachelor of Science in Geological Engineering (GPA: 3.36 / 4.00) *2016 –2021*

- Active in geological and educational student organizations through leadership and coordination roles.

TECHNICAL SKILLS

- **Geological & Industry Software:** Petrel, DSG, ArcGIS, QGIS
- **Data Analysis & Reporting:** Python, SQL, Microsoft Excel, Microsoft Word, Microsoft Powerpoint, Power BI, Tableau, Data Visualization, Technical Reporting
- **Database:** SQL (PostgreSQL, MySQL), SQL Server, Database Design, Data Management, Data Validation, QA/QC
- **Programming & Development:** Programming Language (Python, JavaScript), API (FastAPI, Fastify), Framework (React, Next.js)
- **Data Science & AI:** Exploratory Data Analysis (EDA), Statistical Analysis, Machine Learning, Feature Engineering, AI-assisted Workflow Automation

CORE COMPETENCIES

Geological & Exploration Data Analysis || Geospatial Data Mangement || Exploration Database Management || Technical Evaluation || Data Validation & QA/QC || Analytical Problem Solving || Technical Reporting || Upstream Oil & Gas Data Management || Cross-functional Collaboration || Digital Transformation || Project Coordination

LANGUAGES & CERTIFICATIONS

- Languages**:** Indonesian (Fluent), English (Professional – TOEFL 580)
- Certifications**:** Deep Learning in Geology - Geosoftware | Analytics & Data Science – Pacmann | Google Cybersecurity Certificate
